

# My Critterpedia Maker

Raquel Hidalgo

## What to find?

My Critterpedia Maker is a web created with ❤️ for all the animal crossing fans.

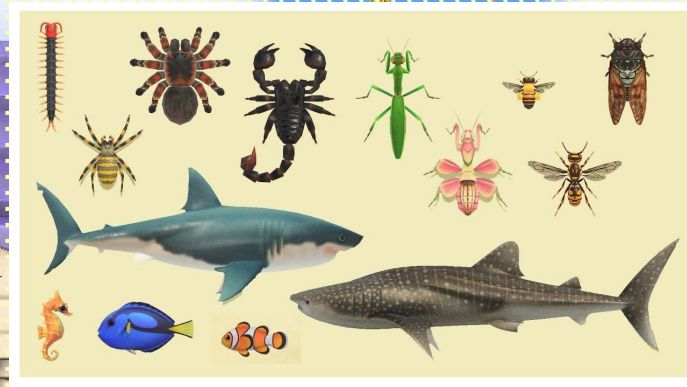

You can keep track of the critters you catch and those you did not catch **YET!**

# What is a critter?

It is part of the experience as Animal Crossing villager to catch the different insects, sea creatures and fish (aka critters) found on the island to be able to exchange them for tools or other utilities.

## My biggest challenge

Working with an API for the first time and how to receive the information from it.

## It's solved!

API documentation

IH documentation
